

# **DOC SERIES**

# SUBMERSIBLE PUMPS

DOC pumps are versatile, corrosion-resistant and compact. Three basic versions are available with 0.3 to 0.7 kW power. A DOC 7VX version with Vortex impeller is available.

## **APPLICATIONS**

- Emptying of residential sump pits, rainwater tanks or laundry drainage.
- Garden and lawn irrigation, with suction from rainwater tanks.
- Emergency draining of flooded basements and garages.
- Transfer of water from tanks, cistems and swimming pools.
- Water display, fountains.

# SPECIFICATIONS

- Maximum liquid temperature: 40°C with partially submerged pump.
- Dry motor.
- Maximum immersion depth: 5 m.
- Class B insulation.
- IP 68 protection.
- The DOC 3 pump has a delivery of 145 l/min, head up to 7 m, and passes suspended solids up to 10 mm in diameter. Only available in single-phase version.
- The DOC 7 pump has a delivery of 225 l/min, head up to 11 m, and passes suspended solids up to 10 mm in diameter.
- The DOC 7VX pump has a delivery of 180 l/min, head up to 7 m, and can handle liquids with suspended solids up to 20 mm in diameter.
- A "shallow-suction device", that can be mounted on both the DOC3 and DOC7 models, is available on request. It ensures complete drainage of flooded floors (to 3 mm from floor).
- Versions:

**Single-phase** 220 V 50 Hz 2 poles (2850 rpm). **Three-phase** 380-415 V 50 Hz 2 poles (2850 rpm).

• 60 Hz and without floats (SG) models are available on request or tube float switch.

• The single-phase versions feature: Pre-assembled float for automatic pump operation (version without float available on request SG).

**Built-in capacitor.** 

**Thermal overload protection** to stop pump supply in case of overheating.

# LAB-LIP SEAL SYSTEM

• The electric motor is protected by **three lip** seals.

An **impeller counterblade** system keeps solid particles away from the seal unit to prevent damage to the lip seals and ensure their long-lasting efficiency. A double

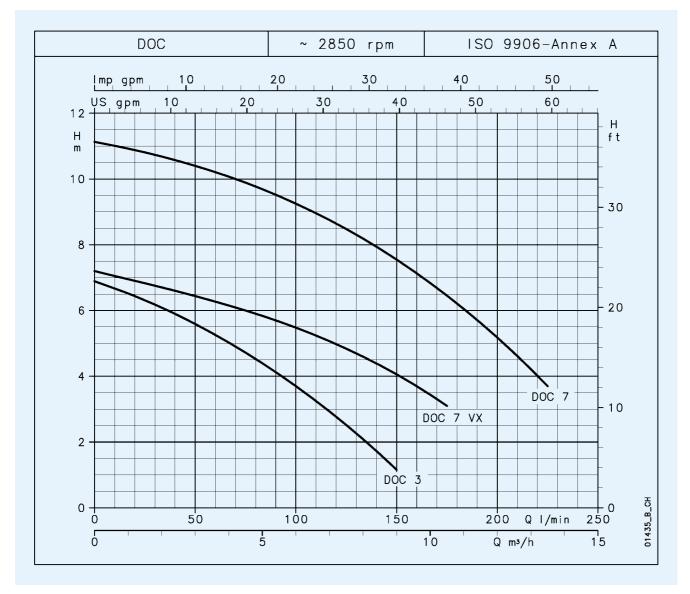

**Labyrinth** and a **V-ring** on the shaft have also been provided.

# TABLE OF MATERIALS

PART	MATERIAL
Pump body, Suction screen, Handle, Upper support, Impeller	NORYL TECHNOPOLYMER
Outer sleeve, Motor casing, Lower cover, Screws and tie-rods	STAINLESS STEEL (AISI 304 - DIN 1.4301)
Shaft extension	STAINLESS STEEL (AISI 416 - DIN 1.4005)
Elastomers	NITRILE RUBBER (NBR)

# **DOC SERIES OPERATING CHARACTERISTICS AT 2850 rpm 50 Hz**

PUMP TYPE	RA					Q =	= DELIVERY					
	POWER		l/min	0	25	50	75	100	125	150	175	225
			m³/h	0	1.5	3	4.5	6	7.5	9	10.5	13.5

### **INSTALLATION DIAGRAM**

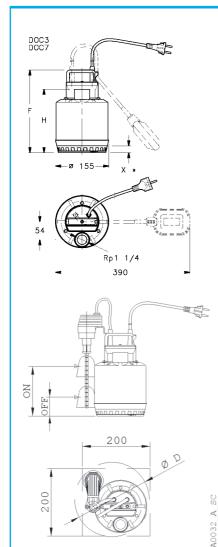

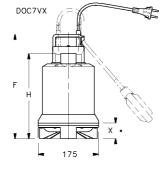

PUMP TYPE	DIMENSIO	DNS (mm)	MINIMUM WATER LEVEL	MAXIMUM WATER LEVEL
	Α	В	с	D
DOC3	390	330	50	310
DOC7	390	370	90	350
DOC7VX	390	395	115	375
			do	ocliv-2p50_a_td

This float switch allows the pump to be used where standard float design cannot work due to insufficient space. The pump with this system can only be installed vertically and can only be used with clean or coloured water.

#### **DOC SERIES DIMENSIONS AND WEIGHTS**

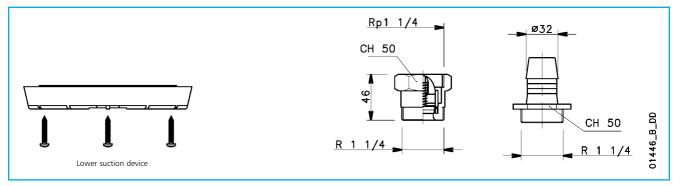

PUMP TYPE	DIN	WEIGHT
